UKR Fier

Drinking water network rehabilitation and extension

- Supply and installation of ca. 22 km of pipes
- Nearly 1550 new water supply connections have been installed
- About 1,700 new individual water meters have been installed in Fier

Karafaj well field - construction of new pumping station

The new Karafaj pumping station will replace the old chinese pumps from 1964 and provide clean and safe drinking water 24/7 for the citizens of Fier.

Computerised monitoring for controlling the water network and reduce water loss

The implementation of a new computer system allows to monitor in real time all relevant elements of the drinking water system of Fier: reservoirs, well fields and water distribution networks.

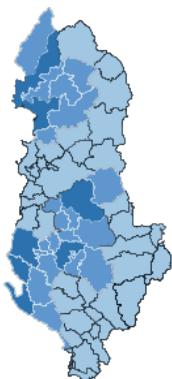

Sewerage water network

Rehabilitation and new network - laying of over 8.5 km wastewater network and nearly 700 new network connections

Key impact: clean and safe drinking water 24/7 for the citizens of Fier

Overall WPIP MIP V - EUR 145.7 million investment measures for 6 regional water supply and sewerage companies

German Financial Cooperation through KfW	Loan	EUR 80 million
German Government	Grant	EUR 9 million
