

UKR Lezhe - EUR 18 million WPIP / MIP V investment measures

Drinking Water Supply

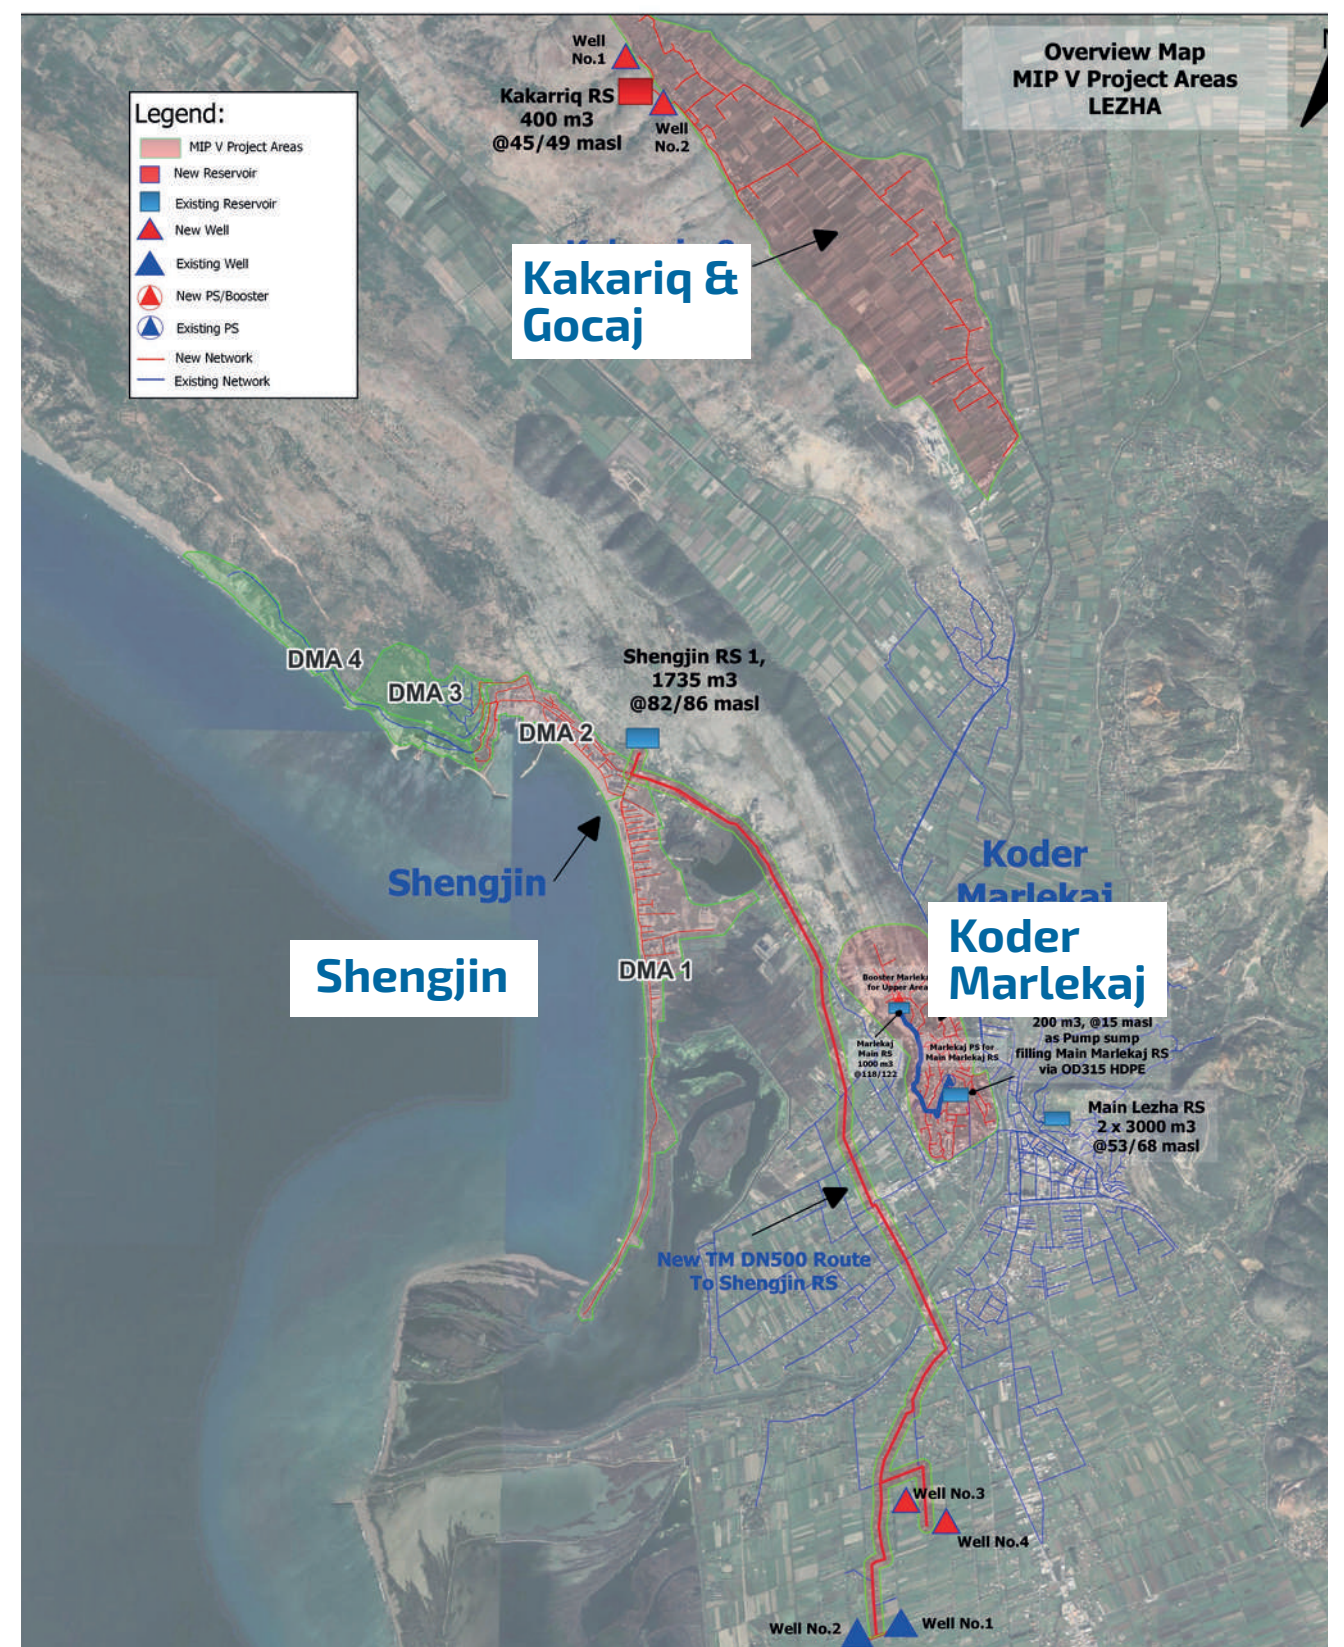

- **Shengjin water supply system:** Over 5 km new transmission main and rehabilitation of existing wells
- **Kodra Marlekaj:** new distribution network (over 12 km pipes) and booster pump station
- **Kakariq & Gocaj Village Water Supply System:** 2 new wells, new reservoir and new distribution net work (over 16 km pipes)

Waste Water System

- Upgrading **Wastewater Treatment Plant** – new inlet pumping station, mechanical equipment

Storm water system

- Complete **redesign of the stormwater network** in order to capture a maximum of the outer/rural areas on the hillside and to avoid discharge to low-lying areas in the city-centre
- **Separation of wastewater from storm water** in the network;
- For **Disaster Risk Reduction:** new box culverts, sediment traps, construction and rehabilitation of stormwater pumping stations.

Key impact: two completely new networks - more safety for people from stormwater
